

# Arohan Harsh Dubey

Backend Software Engineer | Node.js Developer | AI Engineer

📞 +91-8394044550    ✉️ coool.aro24@gmail.com    🔗 LinkedIn    🐙 GitHub

## Professional Summary

---

Backend Software Engineer with 3+ years of experience designing and developing enterprise applications using Node.js, Express.js, MongoDB and PostgreSQL. Experienced in REST API development, recruitment platforms, Generative AI integration, Prompt Engineering and scalable backend architecture. Passionate about building reliable software and solving complex engineering problems.

## Technical Skills

---

**Languages:** JavaScript (ES6+), Java, C#, SQL

**Backend:** Node.js, Express.js, REST APIs, JWT, OAuth, Mongoose

**Frontend:** React.js, HTML5, CSS3, Bootstrap, Material UI

**Databases:** MongoDB, PostgreSQL, MySQL

**AI/LLM:** OpenAI API, Gemini API, HuggingFace, Prompt Engineering, AI Agents

**Tools:** Git, GitHub, Postman, Vite

## Professional Experience

---

### WalkingTree Technologies

Apr 2024 – Present

*Software Developer*

- Developed backend services for enterprise recruitment and assessment platform using Node.js, Express.js, MongoDB and PostgreSQL.
- Designed REST APIs for candidate management, interview scheduling, assessment workflows and report generation.
- Implemented authentication, role-based access control and backend validation.
- Optimized MongoDB aggregation pipelines and database queries.
- Collaborated with frontend, QA and product teams in Agile SDLC.

### LeewayHertz Technologies

Jan 2023 – Mar 2024

*Associate Software Developer*

- Built backend modules and full-stack features for web applications.
- Worked on Generative AI solutions using OpenAI APIs and prompt engineering.
- Contributed to AI-powered content generation workflows and backend APIs.

## Projects

---

### Smart Recruit

- Developed backend modules for candidate lifecycle, assessments, interview scheduling and reporting.
- Built secure REST APIs and optimized MongoDB queries.
- Worked on AI-assisted assessment generation and workflow automation.

### Plutas.ai

- Developed backend APIs using Node.js and PostgreSQL.
- Designed relational database schema and secure service endpoints.

### MakeMyTale

- Built AI-powered storytelling workflows using OpenAI APIs.
- Implemented prompt engineering and multimedia generation features.

### Social Media Application

- Developed authentication, user management and post management APIs using Node.js and MongoDB.

## Education

---

### **Master of Computer Applications**

Dr. A.P.J. Abdul Kalam Technical University — 80%

### **Bachelor of Commerce**

Jiwaji University
